

# Safety Program Theme Graphic

A theme graphic has been developed for use on internal safety program materials. When using this mark you must observe all existing guidelines as outlined in the *Hemlock Semiconductor Brand Guidelines*.

## Clear Zone

The graphic must always be surrounded on all four sides by a clear field or margin equal to the height of the letter "H" in line one of the mark.

## Color Options

The theme graphic may be produced in one of these four color schemes. No other colors may be used.

3-Color

White (Reversed, light background)

3-Color (Dark background)

Black (Imprint)
