

Safety Program Theme Graphic

A theme graphic has been developed for use on internal safety program materials. When using this mark you must observe all existing guidelines as outline in the *Hemlock Semiconductor Brand Guidelines*.

Clear Zone

The graphic must always be surrounded on all four sides by a clear field or margin equal to the height of the letter “H” in line one of the mark.

Color Options

The theme graphic may be produced in one of these four color schemes. No other colors may be used.

3-Color

White (Reversed, light background)

3-Color (Dark background)

Black (Imprint)
