

Kiosk Instructions

1. Unpacking images

2. Setup Instructions – The instructions show the monitor being mounted vertically. For the NFSA show in TX, the monitor should be mounted horizontally since it will just be used to play videos.

3. Touchscreen cord – We find it best to tape the cord accordingly and let it flow through the channel for a finished appearance.

4. Touchscreen safety releases – We would like the release straps to be wrapped around the monitor mount so they don't dangle in the back.

5. Kiosk assembled
